

GS360 Parking

Yellow arrows indicate flow of vehicles for parking. Look for volunteers waving cars into either the south or north side of the trail, along the fence line. Vehicles will be directed to drive along the fence line towards the trailhead and park at a 45 degree angle facing the fence (small arrows). The north side of the trailhead is more level and easier to drive/park. Bigger trucks & SUV's will be fine on the southside, we do not recommend cars coming in this end.

There are 28 parking spaces at the paved lot less than ½ mile south of the trailhead (bathrooms there too). Fill that lot up first, cars especially. We expect the dirt lot to fill up fast with staff, volunteers, timing, sponsors, etc. Avoid coming down to the dirt lot entrance, you will be sent north or south to one of the entrances indicated by the big yellow arrows.

Help us avoid traffic bottle necking and vehicles backing into Colbert Lane (55mph) by not pulling into the dirt driveway. We're just going to send you back onto Colbert to enter through the north or side end.

Thank you for following these instructions to help ensure a smooth race morning!
